

SCALIS

AUTOMAT S

The basic self-weighing system with RFID or QR code reader. Terminal is equipped with RFID card reader or QR code reader. On RFID card or QR code are stored informations about license plate of truck, name of the company, materials and so on. Driver will attach RFID card or scan QR code from smartphone or document. Scale will record information from QR code and save weighing. On second weighing the process repeat and after that weighing is finished with result in net weight.
